

Notice to Mariners № 07 of 2018

St Helier Fisherman Pontoons Replacement Project

As part of the current Fisherman Pontoons Replacement Project, Ports of Jersey will, as from this week, assist in the housing of the Island's fishing fleet while its new pontoon infrastructure is installed. As a result some of the affected fishing vessels will be accommodated on D pontoon in La Collette Yacht Basin. Although there will still be some space left in this area for leisure users, customers are invited to use the Albert Pier holding pontoons as an alternative. The replacement project is progressing well and on schedule, with completion due by the end of April 2018. For further information relating to the project visit
