

Notice to Mariners № 26 of 2018

Jersey - St Helier Harbour – Elizabeth Marina Elizabeth Marina Tidal Gate

Due to technical issues with the functioning of the Elizabeth Marina Storm Gate, which mean that the tidal gate will not automatically lower when the half-tide level is reached, the decision has been made to keep the tidal gate locked in the raised position until these issues are fixed.

The tidal gate extends 5.70m above chart datum. Mariners must ensure that they have sufficient depth of water over the gate, and that an appropriate margin for under-keel clearance is allowed.

ALL Vessels that enter or leave the Elizabeth Marina are to call St Helier VTS on VHF Ch 14 for permission to enter/leave Elizabeth marina and must include a report of their draught.

There will be no traffic lights operating during this time.

This notice will be cancelled when the tidal gate is back to automatic operation.

Captain Bill Sadler
Harbour Master, Jersey Harbours
